

Hello everyone;

2016

Another year just flew by, but it did not go unnoticed. New park playground equipment installed. Streets paved in the Saw Mill area. Ball park parking lot patched and a handicap walkway installed. These projects were all largely paid through grants. Crack sealing completed on various streets and more storm sewers dugout to help prevent street flooding. The State paved both alternate routes coming into town and the City Building interior electric was upgraded to pass code.

2017

Looking forward! A new garbage collection company, Best Way, wants you to know they will serve you professionally. If you have anything troubling you or see a way to improve the system, please call the City Building. The bid for the automated sewer plant will be awarded in January. This is a 2 year project funded by grants and a loan. I will keep you updated on the progress and the loan re-payment plan.

The Planning Committee is upgrading the Zoning Regulations for approval by the Planning-Zoning Board. The Personnel committee is revising the Policies and Procedures manual, and then the next project is to collect data for a Utilities manual. Service and Leisure is putting together a plan to repair more streets and upgrade sidewalks. Will keep you posted.

If there is a project you wish to discuss, call the city building and make an appointment to meet with me. Hopefully we will soon have an Administrator.

**Garbage pickup dates will remain on Wednesday through January 25<sup>th</sup>**

**\*\*New Garbage Pickup Dates Will Be\*\***

<b>Beginning January 31, 2016</b>	<b><u>Tuesday Pickup Date</u></b>	<b><u>Friday Pickup Date</u></b>
	All of George St	Everyone South of George St
	Everyone North of George St	

***\*\*These changes will only affect residents inside village corporation limits\*\****

Keep Warm! "Judy's on Duty"

**A T T E N T I O N**  
**Notice from Vectren**

The Department of Transportation (DOT) regulations require natural gas system operators to conduct leak surveys on all piping including underground mains, services & exposed piping up to the outlet of the gas meter. If the meter is located inside your home, The Health Consultant Technician will come to your door, show a visible ID and have a Vectren Contact Phone Number you can call for verification. The technician will not be driving a Vectren vehicle; they will be driving their own personal vehicle. The inspection inside your home will only take about 5 minutes.
